## AIM AND TARGETS

*The meeting is aimed for general pathologists and for those with a specific interest in lung pathology. The course will provide formal lectures and slide seminars and informal and interactive workshops. During these workshops Dr. Mattia Barbareschi will show histological glass/virtual slides which he has not seen before: these cases will be presented by the Italian members of the faculty and will be discussed by Dr. Thomas Colby and Dr. Kevin O. Leslie. These workshops will try to simulate real life diagnostic routine, with the aim to have a lively and free discussion of these cases. Participants will be welcomed to take active part to these workshops.*

***The number of participants will be limited to 150 participants and therefore early application is advised.***
