COURSE DESCRIPTION

The course is organized as a theoretical-practical
review of relevant aspects of haematopathology.

The course is designed to be very interactive. The
faculty will give lectures, show typical morphologic
entities and discuss how to approach specific
issues in multiheaded microscopes (two 16
headed microscopes and 2 microscopes with
projection screens), dividing the attendants into 4
different groups. The attendants will rotate through
the different settings, so everyone has similar
exposure to the invited faculty, cases and settings.

The course is limited to 90 individuals in order to
accommodate everybody at the practical sessions.

An option to attend the lectures only is also
available with a lower registration fee and limited
to 125 individuals plus.
