

Dear Colleague,

The [Association for Molecular Pathology \(AMP\)](#) is organizing its European Meeting in **Madrid, Spain from June 24-26, 2024**. AMP is the leading organization in the field of molecular diagnostics, and [AMP Europe 2024](#) will explore how cutting-edge technology and developments in molecular testing and diagnostics continue to have a major impact on patient care.

Session topics include:

- Molecular Surveillance for Emerging Pandemic Threats
- Health Data Interoperability
- Tackling Diversity, Equity, and Inclusion in Genetic/Genomic Testing
- Molecular Pathology of Lymphoid Neoplasms
- Fusion Detection for All
- Digital Twin Technology in Medicine
- New Frontier in Genetics
- Artificial Intelligence in Molecular Medicine
- Molecular Classification and Prognostication of Myeloid Neoplasms
- Potential Applications of Artificial Intelligence to Combat the Global Spread of Antimicrobial Resistance
- High Sensitivity Detection of Minimal/Molecular Residual Disease
- PGx in the Clinic: This Time is for Real
- DNA Methylation - Practical Implementation and Future Directions

Please view the full program online [here](#).

On behalf of the [Organizing Committee](#), I am seeking your support in listing the event on your website and/or sharing the event details through your membership communications. If you are not the appropriate recipient for this type of request, please kindly forward this message to the correct person. The AMP Director of Meetings & Exhibits, Sara Hamilton ([shamilton@amp.org](mailto:shamilton@amp.org)), cc above, and our Professional Conference Organizer, MCI ([amp-europe@wearemci.com](mailto:amp-europe@wearemci.com)) can also be contacted to answer any additional questions.

We'd be happy to welcome you and any of your members to AMP Europe 2024.

Many thanks again for your kind support and we look forward to your reply.

Warm Regards,

Fernando Lopez-Rios, MD, PhD  
Member, International Affairs Committee, AMP

Hospital Universitario 12 de Octubre, Madrid (Spain)
